Princeton University Press is collaborating with JSTOR to digitize, preserve and extend access to *Time Series Analysis*

Contents

PREFACE xiii

1 *Difference Equations* 1

- 1.1. First-Order Difference Equations 1
- 1.2. p th-Order Difference Equations 7

APPENDIX 1.A. *Proofs of Chapter 1 Propositions* 21
***References* 24**

2 *Lag Operators* 25

- 2.1. Introduction 25
- 2.2. First-Order Difference Equations 27
- 2.3. Second-Order Difference Equations 29
- 2.4. p th-Order Difference Equations 33
- 2.5. Initial Conditions and Unbounded Sequences 36

***References* 42**

3 *Stationary ARMA Processes* 43

- 3.1. Expectations, Stationarity, and Ergodicity 43
- 3.2. White Noise 47
- 3.3. Moving Average Processes 48
- 3.4. Autoregressive Processes 53
- 3.5. Mixed Autoregressive Moving Average Processes 59

- 3.6. The Autocovariance-Generating Function 61
- 3.7. Invertibility 64

**APPENDIX 3.A. Convergence Results for Infinite-Order
Moving Average Processes 69**
Exercises 70 References 71

4 *Forecasting* 72

- 4.1. Principles of Forecasting 72
- 4.2. Forecasts Based on an Infinite Number
of Observations 77
- 4.3. Forecasts Based on a Finite Number
of Observations 85
- 4.4. The Triangular Factorization of a Positive Definite
Symmetric Matrix 87
- 4.5. Updating a Linear Projection 92
- 4.6. Optimal Forecasts for Gaussian Processes 100
- 4.7. Sums of *ARMA* Processes 102
- 4.8. Wold's Decomposition and the Box-Jenkins
Modeling Philosophy 108

**APPENDIX 4.A. Parallel Between OLS Regression
and Linear Projection 113**

**APPENDIX 4.B. Triangular Factorization of the Covariance
Matrix for an *MA*(1) Process 114**
Exercises 115 References 116

5 *Maximum Likelihood Estimation* 117

- 5.1. Introduction 117
- 5.2. The Likelihood Function for a Gaussian *AR*(1)
Process 118
- 5.3. The Likelihood Function for a Gaussian *AR*(*p*)
Process 123
- 5.4. The Likelihood Function for a Gaussian *MA*(1)
Process 127
- 5.5. The Likelihood Function for a Gaussian *MA*(*q*)
Process 130
- 5.6. The Likelihood Function for a Gaussian *ARMA*(*p*, *q*)
Process 132
- 5.7. Numerical Optimization 133

- 5.8. Statistical Inference with Maximum Likelihood Estimation 142
- 5.9. Inequality Constraints 146

APPENDIX 5.A. Proofs of Chapter 5 Propositions 148
Exercises 150 References 150

6 *Spectral Analysis* 152

- 6.1. The Population Spectrum 152
- 6.2. The Sample Periodogram 158
- 6.3. Estimating the Population Spectrum 163
- 6.4. Uses of Spectral Analysis 167

APPENDIX 6.A. Proofs of Chapter 6 Propositions 172
Exercises 178 References 178

7 *Asymptotic Distribution Theory* 180

- 7.1. Review of Asymptotic Distribution Theory 180
- 7.2. Limit Theorems for Serially Dependent Observations 186

APPENDIX 7.A. Proofs of Chapter 7 Propositions 195
Exercises 198 References 199

8 *Linear Regression Models* 200

- 8.1. Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances 200
- 8.2. Ordinary Least Squares Under More General Conditions 207
- 8.3. Generalized Least Squares 220

APPENDIX 8.A. Proofs of Chapter 8 Propositions 228
Exercises 230 References 231

9 *Linear Systems of Simultaneous Equations* 233

- 9.1. Simultaneous Equations Bias 233
- 9.2. Instrumental Variables and Two-Stage Least Squares 238

- 9.3. Identification 243
- 9.4. Full-Information Maximum Likelihood Estimation 247
- 9.5. Estimation Based on the Reduced Form 250
- 9.6. Overview of Simultaneous Equations Bias 252

APPENDIX 9.A. Proofs of Chapter 9 Proposition 253

Exercise 255 References 256

10 Covariance-Stationary Vector Processes 257

- 10.1. Introduction to Vector Autoregressions 257
- 10.2. Autocovariances and Convergence Results for Vector Processes 261
- 10.3. The Autocovariance-Generating Function for Vector Processes 266
- 10.4. The Spectrum for Vector Processes 268
- 10.5. The Sample Mean of a Vector Process 279

APPENDIX 10.A. Proofs of Chapter 10 Propositions 285

Exercises 290 References 290

11 Vector Autoregressions 291

- 11.1. Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression 291
- 11.2. Bivariate Granger Causality Tests 302
- 11.3. Maximum Likelihood Estimation of Restricted Vector Autoregressions 309
- 11.4. The Impulse-Response Function 318
- 11.5. Variance Decomposition 323
- 11.6. Vector Autoregressions and Structural Econometric Models 324
- 11.7. Standard Errors for Impulse-Response Functions 336

APPENDIX 11.A. Proofs of Chapter 11 Propositions 340

APPENDIX 11.B. Calculation of Analytic Derivatives 344

Exercises 348 References 349

12	<i>Bayesian Analysis</i>	351
12.1.	Introduction to Bayesian Analysis	351
12.2.	Bayesian Analysis of Vector Autoregressions	360
12.3.	Numerical Bayesian Methods	362
	APPENDIX 12.A. Proofs of Chapter 12 Propositions	366
	<i>Exercise</i> 370	<i>References</i> 370
13	<i>The Kalman Filter</i>	372
13.1.	The State-Space Representation of a Dynamic System	372
13.2.	Derivation of the Kalman Filter	377
13.3.	Forecasts Based on the State-Space Representation	381
13.4.	Maximum Likelihood Estimation of Parameters	385
13.5.	The Steady-State Kalman Filter	389
13.6.	Smoothing	394
13.7.	Statistical Inference with the Kalman Filter	397
13.8.	Time-Varying Parameters	399
	APPENDIX 13.A. Proofs of Chapter 13 Propositions	403
	<i>Exercises</i> 406	<i>References</i> 407
14	<i>Generalized Method of Moments</i>	409
14.1.	Estimation by the Generalized Method of Moments	409
14.2.	Examples	415
14.3.	Extensions	424
14.4.	GMM and Maximum Likelihood Estimation	427
	APPENDIX 14.A. Proofs of Chapter 14 Propositions	431
	<i>Exercise</i> 432	<i>References</i> 433
15	<i>Models of Nonstationary Time Series</i>	435
15.1.	Introduction	435
15.2.	Why Linear Time Trends and Unit Roots?	438

- 15.3. Comparison of Trend-Stationary and Unit Root Processes 438
- 15.4. The Meaning of Tests for Unit Roots 444
- 15.5. Other Approaches to Trended Time Series 447

**APPENDIX 15.A. Derivation of Selected Equations
for Chapter 15 451**
References 452

16 *Processes with Deterministic Time Trends* 454

- 16.1. Asymptotic Distribution of *OLS* Estimates of the Simple Time Trend Model 454
- 16.2. Hypothesis Testing for the Simple Time Trend Model 461
- 16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

**APPENDIX 16.A. Derivation of Selected Equations
for Chapter 16 472**
Exercises 474 References 474

17 *Univariate Processes with Unit Roots* 475

- 17.1. Introduction 475
- 17.2. Brownian Motion 477
- 17.3. The Functional Central Limit Theorem 479
- 17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
- 17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
- 17.6. Phillips-Perron Tests for Unit Roots 506
- 17.7. Asymptotic Properties of a *p*th-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
- 17.8. Other Approaches to Testing for Unit Roots 531
- 17.9. Bayesian Analysis and Unit Roots 532

APPENDIX 17.A. Proofs of Chapter 17 Propositions 534
Exercises 537 References 541

18	<i>Unit Roots in Multivariate Time Series</i>	544
18.1.	Asymptotic Results for Nonstationary Vector Processes	544
18.2.	Vector Autoregressions Containing Unit Roots	549
18.3.	Spurious Regressions	557
	APPENDIX 18.A. Proofs of Chapter 18 Propositions	562
	<i>Exercises</i>	<i>568</i>
	<i>References</i>	<i>569</i>
19	<i>Cointegration</i>	571
19.1.	Introduction	571
19.2.	Testing the Null Hypothesis of No Cointegration	582
19.3.	Testing Hypotheses About the Cointegrating Vector	601
	APPENDIX 19.A. Proofs of Chapter 19 Propositions	618
	<i>Exercises</i>	<i>625</i>
	<i>References</i>	<i>627</i>
20	<i>Full-Information Maximum Likelihood Analysis of Cointegrated Systems</i>	630
20.1.	Canonical Correlation	630
20.2.	Maximum Likelihood Estimation	635
20.3.	Hypothesis Testing	645
20.4.	Overview of Unit Roots—To Difference or Not to Difference?	651
	APPENDIX 20.A. Proofs of Chapter 20 Propositions	653
	<i>Exercises</i>	<i>655</i>
	<i>References</i>	<i>655</i>
21	<i>Time Series Models of Heteroskedasticity</i>	657
21.1.	Autoregressive Conditional Heteroskedasticity (ARCH)	657
21.2.	Extensions	665
	APPENDIX 21.A. Derivation of Selected Equations for Chapter 21	673
	<i>References</i>	<i>674</i>

22	<i>Modeling Time Series with Changes in Regime</i>	677
-----------	--	-----

- 22.1. Introduction 677
- 22.2. Markov Chains 678
- 22.3. Statistical Analysis of i.i.d. Mixture Distributions 685
- 22.4. Time Series Models of Changes in Regime 690

APPENDIX 22.A. Derivation of Selected Equations for Chapter 22 699

Exercise 702 References 702

A	<i>Mathematical Review</i>	704
----------	----------------------------	-----

- A.1. Trigonometry 704
- A.2. Complex Numbers 708
- A.3. Calculus 711
- A.4. Matrix Algebra 721
- A.5. Probability and Statistics 739

References 750

B	<i>Statistical Tables</i>	751
